Record Start Date _____

Record End Date _____

The Plan

Once parasite enemies are known and understood, the right deworming program can be planned for each individual horse, based first on age and then on other conditions that may include regional climate conditions, stocking density, history of dewormer use, and results of fecal testing. Good management includes providing a clean environment and reviewing deworming programs each year.

FOALS	2 - 3 Months Compound: Compound: Fenbendazole/ Products: Anthelcide EQ, Panacur Paste, Safe-Guard Paste	4 - 5 Months Compound: Compound: Pyrantel Pamoate Products: Exodus Paste, Strongid Paste, FC Equistrength	6 - 7 Months Compound: Compound: Fenbendazole/ Products: Anthelcide EQ, Panacur Paste, Safe-Guard Paste, Safe-Guard Equi-Bits	8 - 9 Months Compound: Compound: Ivermectin w/Praziquantel Products: Equimax, Zimecterin Gold	11 - 12 Months Compound: Compound: Fenbendazole/ Products: Safe-Guard Power Dose, Panacur PowerPac	
ADOLESCENTS	Spring Compound: Compound: Ivermectin Products: FC Ivermax, Bimectin, Horse Health Ivermectin Paste, IverCare, Zimecterin	Early Summer Compound: Pyrantel Pamoate Products: Exodus Paste, Strongid Paste, FC Equistrength	Late Summer Compound: Fenbendazole/ Products: Anthelcide EQ, Panacur Paste, Safe-Guard Paste, Safe-Guard Equi-Bits	Early Fall Compound: Pyrantel Pamoate Products: Exodus Paste, Strongid Paste, FC Equistrength	Late Fall Compound: Ivermectin w/Praziquantel Products: Equimax, Zimecterin Gold	
ADULT HIGH-SHEDDERS	Late Winter/Early Spring Compound: Fenbendazole/ Products: Safe-Guard Power Dose, Panacur PowerPac	Spring Compound: Ivermectin or Moxidectin Products: FC Ivermax, Bimectin, Horse Health Ivermectin Paste, IverCare, Zimecterin, Quest Gel	Early Fall Compound: Fenbendazole/ Products: Anthelcide EQ, Panacur Paste, Safe-Guard Paste, Safe-Guard Equi-Bits	Late Fall Compound: Ivermectin or Moxidectin w/Praziquantel Products: Equimax, Zimecterin Gold, Quest Plus
